INNOVATIVE BAFFLE DESIGN
Most EPA units have secondary air tubes that reduce the firebox height and require maintenance. Our unique design allows secondary air to enter through a perforated baffle offering an unimpeded view of the fire all while increasing the efficiency and combustion.

REVERSIBLE CAST-IRON PANELS
Crafted with care, our heavy-duty cast iron panels are stamped with a brick pattern on one side and a flowing contemporary design on the other. These reversible panels provide a versatile design that is as beautiful as it is functional.

Our finely crafted door handle has an ergonomic design and keeps the door shut by means of a latch for a secure operation.
