	<b>EPA Firebox Size</b>	1.8 cubic feet	<b>Glass Dimensions</b>	19¼" x 11¼"
	<b>Chimney Liner</b>	5 inch (The use of a 5½ inch or 6 inch liner is possible)*	<b>Patent Numbers</b>	7/325,547 & 9/476,593

\*Adapter required

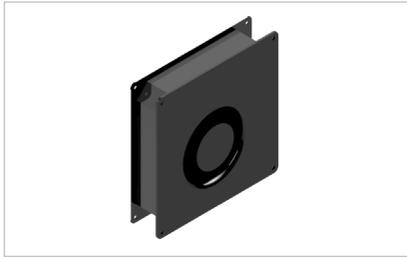

### Patented Automatic Air Control

This patented, user-friendly mechanism automatically reduces the amount of combustion air introduced during ignition to the desired burn rate setting. The result is a beautifully consistent fire burning to its full capacity.

### Circulating Chamber

The patented adjustable circulating chamber is designed to prevent heat escaping from the existing chimney and allows for an optimal flow and heat transfer.

### Premium Quality Blowers (110 CFM)

As an option, this powerful yet whisper-quiet system effortlessly distributes heat over significant distances. As the combustion progresses, the high-quality blower automatically activates and is set using the variable speed controller.

### Stainless Steel Surround

The Fusion fireplace also comes in a beautiful stainless steel surround option.

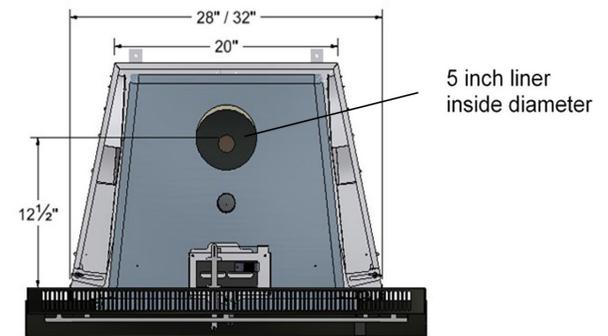

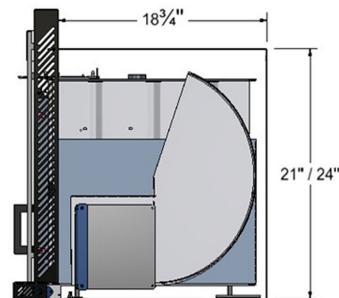

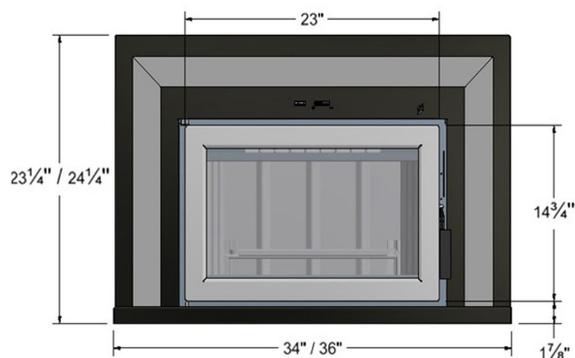

### Built-In Barbecue Grill

This exceptional feature offers the ability to create meals imbued with flavorful smokiness inside the comfort of your own home. Simply drop down the grill once the wood has reduced to embers and place your food inside; the result is memorable barbecued dishes all year-round.

### Innovative Baffle Design

Our products have a unique design that allows secondary air to enter through a perforated baffle offering an unimpeded viewing area to the fire all while increasing the efficiency and prolonging the combustion.
